2. ACCOUNTING CONVENTION AND FINANCIAL YEAR

Accounting convention

The accompanying financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting.

The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

Financial year

The Company's financial year begins on 01 January and ends on 31 December.

Interim Financial Statement for the six month for period from 01 January to 30 June.

3. APPLICABLE ACCOUNTING STANDARDS AND REGULATIONS

The financial statements have been prepared in accordance with Circular No. 99/2025/TT-BTC issued by the Ministry of Finance on October 27, 2025 ("Circular 99"), which provides guidance on the corporate accounting regime.

The financial statements have been prepared in compliance with Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, and relevant statutory regulations governing the preparation and presentation of financial statements.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Company in the preparation of these financial statements, are as follows:

ESTIMATES

The preparation of financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires the Board of Management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the financial year. Although these accounting estimates are based on the Board of Management's best knowledge, actual results may differ from those estimates.

Cash

Cash comprises cash on hand and demand deposits.

Receivables

The notes on page 9 đến to 35 are an integral part of these financial statements

NOTES TO THE FINANCIAL STATEMENTS*These notes are an integral part and should be read together with the Financial Statements*

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

Inventories

Inventories are accounted for using the perpetual method and are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the balance sheet date.

Financial investments – Held to maturity investments

Held-to-maturity investments comprise investments that the Company has the positive intent or ability to hold to maturity, including term deposits held to maturity to earn periodic interest.

Post-acquisition interest income from held-to-maturity investments is recognised in profit or loss on accrual basis.

Held-to-maturity investments are measured at cost less provision for impairment of held-to-maturity investments.

Provision for impairment of held-to-maturity investments is made in accordance with prevailing accounting regulations.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use. The costs of self-constructed or manufactured assets are the actual construction or manufacturing cost plus installation and test running costs.

The costs of tangible fixed assets formed from construction investment by contractual mode or self-construction or self-generating process are the settled costs of the invested construction projects in accordance with the prevailing State's regulations on investment and construction management, directly related expenses and registration fee (if any). In the event the construction project has been completed and put into use but the settled costs thereof have not been approved, the cost of tangible fixed assets is recognized at the estimated cost based on the actual cost incurred. The estimated cost will be adjusted according to the settled costs approved by the Board of Directors and the Board of Management based on decentralization of authority.

The notes on page 9 đến to 35 are an integral part of these financial statements

NOTES TO THE FINANCIAL STATEMENTS*These notes are an integral part and should be read together with the Financial Statements*

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

	Years
Buildings and structures	5 - 25
Machinery and equipment	3 - 15
Motor vehicles, transmission equipment	8 - 10
Office equipment	3 - 8
Other tangible fixed assets	3 - 5

Loss or gain resulting from sales and disposals of tangible fixed assets is the difference between the net proceeds from sales or disposals of assets and their carrying amount and is recognized in the income statement.

Intangible assets and amortization

Intangible assets represent computer softwares that are stated at cost less accumulated amortization. Intangible assets are amortized using the straight-line method over their estimated useful lives. The value of computer software is amortized using the straight-line method over a period from 2 to 3 years.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Leases where substantially all the rewards and risks of ownership of assets remain with the leasing company are accounted for as operating leases. Rentals payable under operating leases are charged to the income statement on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are also spread on a straight-line basis over the lease term.

Construction in progress

Properties in the course of construction for production, rental and administrative purposes or for other purposes are carried at cost includes any costs that are necessary to form the asset including construction cost, equipment cost, other directly attributable costs in accordance with the Company's accounting policy. Such costs will be included in the estimated costs of the fixed assets (if settled costs have not been approved) when they are put into use.

According to the State's regulations on investment and construction management, the settled costs of completed construction projects are subject to approval by appropriate level of competent authorities. The final costs of these completed construction projects may vary depending on the final approval by competent authorities.

Prepaid expenses

Prepaid expenses are expenses which have already been paid but relate to results of operations of multiple accounting periods, including renovation, maintenance and repair costs, insurance, tools and supplies issued for consumption, and other types of prepayments arising in the process of production and business activities which are expected to provide future economic benefit to the Company. These expenditures have been capitalised as prepayments, and are allocated to the income statement using the straight-line method in accordance with the current prevailing accounting regulations.

Accrued expenses

The notes on page 9 đến to 35 are an integral part of these financial statements

NOTES TO THE FINANCIAL STATEMENTS*These notes are an integral part and should be read together with the Financial Statements*

Accrued expenses include accrued interest expense and other accrued expenses which have not been paid but have already been incurred and estimated and are recorded as expenses in the periods. Interest expense is recorded on the basis of principal and interest.

Other accruals are other expenses incurred during the year but the Company has not received invoices from suppliers.

Deferred Revenue

Deferred revenue is the amounts received in advance relating to results of operations of for multiple accounting periods for rental services that have not been yet provided or delivered. The Company recognizes Deferred revenue in proportion to its obligations that the Company will have to perform in the future. When the revenue recognition conditions are satisfied, deferred revenue will be recognized in the income statement for the year corresponding to the portion that meets the revenue recognition conditions.

Payable provisions

Provisions are recognized when the Company has a present obligation arising from a past event and it is probable that an outflow of resources will be required to settle the obligation. Such provisions are measured based on Management's best estimate of the expenditures required to settle the obligation as at the end of the reporting period.

Provision for construction warranty related to pipe coating services is recognized for each completed and delivered project or work item during the year, based on the percentage rates specified in the respective contracts. The difference between the provision required to be recognized in the current period and the provision recognized at the end of the previous period is either additionally accrued or reversed, and recorded as an increase or decrease in selling expenses in the financial year. Warranty provisions for construction works related to pipe coating services associated with pipeline construction are classified as current or non-current liabilities in the statement of financial position, depending on the remaining warranty period as stipulated in each contract.

Investment and development fund

Investment and development fund is appropriated from profit after tax according to annual profit distribution resolutions that are approved by the Company's General Meeting of Shareholders. This fund is used to supplement the Company's charter capital and to conduct investment and development projects for main operating activities of the Company.

Revenue recognition**Revenue from the sale of goods**

Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

- (a) the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
 - (b) the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
 - (c) the amount of revenue can be measured reliably;
 - (d) it is probable that the economic benefits associated with the transaction will flow to the Company;
- and

The notes on page 9 đến to 35 are an integral part of these financial statements

NOTES TO THE FINANCIAL STATEMENTS*These notes are an integral part and should be read together with the Financial Statements*

- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from services rendered

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several years, revenue is recognised in each year by reference to the percentage of completion of the transaction at the balance sheet date of that year. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits associated with the transaction will flow to the Company;
- (c) the percentage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

Construction contracts

Where the outcome of a construction contract can be estimated reliably and is accepted by the customers, revenue and costs are recognised by reference to the stage of completion of the contract activity accepted by the customers in the year. Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable of recovery.

Foreign Currencies

Transactions denominated in foreign currencies are translated at the exchange rates prevailing on the transaction dates. The actual transaction exchange rates at the transaction dates represent the average transfer buying and selling rates quoted by the commercial bank with which the Company regularly conducts transactions.

Monetary items denominated in foreign currencies outstanding at the end of the reporting period are translated at the exchange rates quoted by the commercial bank where the Company maintains its accounts. Exchange differences arising are recognized in the statement of profit or loss.

NOTES TO THE FINANCIAL STATEMENTS*These notes are an integral part and should be read together with the Financial Statements***Borrowing costs**

Borrowing costs are recognised in the income statement in the year when incurred unless they are capitalised in accordance with Vietnamese Accounting Standard No. 16 “Borrowing costs”. Accordingly, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. For specific borrowings for the purpose of construction of fixed assets and investment properties, borrowing costs are capitalised even when the construction period is under 12 months.

Taxation

Income tax expense represents the sum of the tax currently payable (including global minimum tax) and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

Additional corporate income tax expense arising from the application of global minimum tax regulations represents the amount of corporate income tax that the enterprise is required to pay additionally to the State budget, as determined in accordance with the applicable regulations on global minimum tax. Upon recognition of the additional corporate income tax expense under global minimum tax regulations, the enterprise simultaneously recognizes the corresponding deferred tax asset.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities’ examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam

NOTES TO THE FINANCIAL STATEMENTS*These notes are an integral part and should be read together with the Financial Statements***Related Parties**

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with the Company, including holding companies, subsidiaries and associates are related parties of the Company. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the enterprise, key management personnel (including Board of Directors, Board of Management, Supervisory Board), close members of the family of these individuals and companies associated with these individuals also constitute related parties. In considering each possible related-party relationship, the Company considers the substance of the relationship, and not merely the legal form.
